Temperature Monitor

IoT Baby Care

Wi-Fi

9110N-WiFi Dinosaur Temperature Monitor

Applicable Fields : Home,Hospital,
School,Care Center,more...

Product Feature

- **Accuracy** – Temperature need to higher accuracy.
- **Safety** – Using FIR, it is more safety without radiation.
- **Usage** – Easy install, Easy Setup and Configuration.
- **Alert** – After temperature trigger, Push notification immediately!

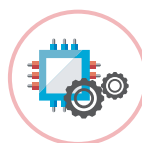

Working Principle

- ThermalPile array sensor receive 10~15um FIR from human body.
- Temperature Algorithm to output right temperature.
- Tuya WiFi will send out temperature to cloud and alert if need.

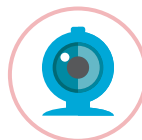

Product Specification

- Sensor Type : ThermalPile Array sensor
- WiFi Feature : Tuya WiFi 2.4Ghz
 - 802.11bgn support
 - Encryption / De-Encryption : WPA,WPA2
- WiFi Setup / Configuration :
 - WiFi Smart Configuration
 - WiFi AP mode
- Detection Area :
 - Distance : 30~50cm
 - Angle : 35 degree

- Temperature Accuracy : $\pm 0.2^{\circ}\text{C}$
- Power : DC 5V1A
- Operation Temperature : 20 ~ 30°C
- Alert Type : High Temperature / Low Temperature (out of bed)
- Display : OLED display for temperature / Logo
- App : iOS / Android
 - Temperature Profile
 - Temperature Alert Setup
 - Temperature Unit : Celsius ($^{\circ}\text{C}$) & Fahrenheit ($^{\circ}\text{F}$)

Easy Setup

Camera-Less

No Radiation

Certification

Auto Detection

Cloud → APP Alarm → Emergency
