➤ Remarks-

1. Detailed instruction can be search or download from the official website:

Chinese website : <http://www.smartbridge-info.com>

English website : <http://www.smartbridge-tech.com>

2. Please do not connect the device to Dinosaur Temperature Monitor with computer or USB hub. It concerned the device to be USB product flash and caused the device LED flash unusual. Please connect the device with adaptor directly.

3. When the device is working , please make sure the device that Dinosaur Temperature Monitor is set range between **30~40cm** from the baby’s forehead.

4. Under normal situation, APP “Tuya Smart” only can show the lowest temperature is $\geq 35^{\circ}\text{C}$ ($\geq 95^{\circ}\text{F}$). But if the temperature $< 35^{\circ}\text{C}$ ($< 95^{\circ}\text{F}$), the APP will not show up. However, the LCD screen of Dinosaur Temperature Monitor will not have limited. It will show what the temperature caught.
